SGFMA is offering another FREE Training Class for our Membership

Evaporative Emissions and the Systems That Control Evaporative Emissions

(To be successful with electrical diagnostics and repairs to the complex systems on cars and trucks today the repair technician must have a working knowledge of and understand circuits and how the circuits work, components and what the components do, while understanding repair procedures and knowing how to use diagnostic testing equipment properly)

This seminar will provide an overview of evaporative emissions and the systems that control them. Topics include the function of the fuel tank ventilation system, charcoal canister, purge and vent valves, fuel tank pressure sensors, Leak Detection Pumps (LDP) and other components. We will discuss the strategies and function of Onboard Refueling Vapor Recovery (ORVR), Engine Off Natural Vacuum (EONV), including the diagnosis of P0440, P0442 and other EVAP system DTCs.

Instructor: Bryan Blackwelder

General Motors Customer Care Product Specialist

February 28th, 2017-----9:00 AM to 3:00 PM

Location: City of Rock Hill

757 S. Anderson Rd
Rock Hill, SC 29730

Free Lunch will be sponsored by SGFMA

Registration Deadline is February 20th and class is restricted to the first 50 people to register
